

Instruction Manual

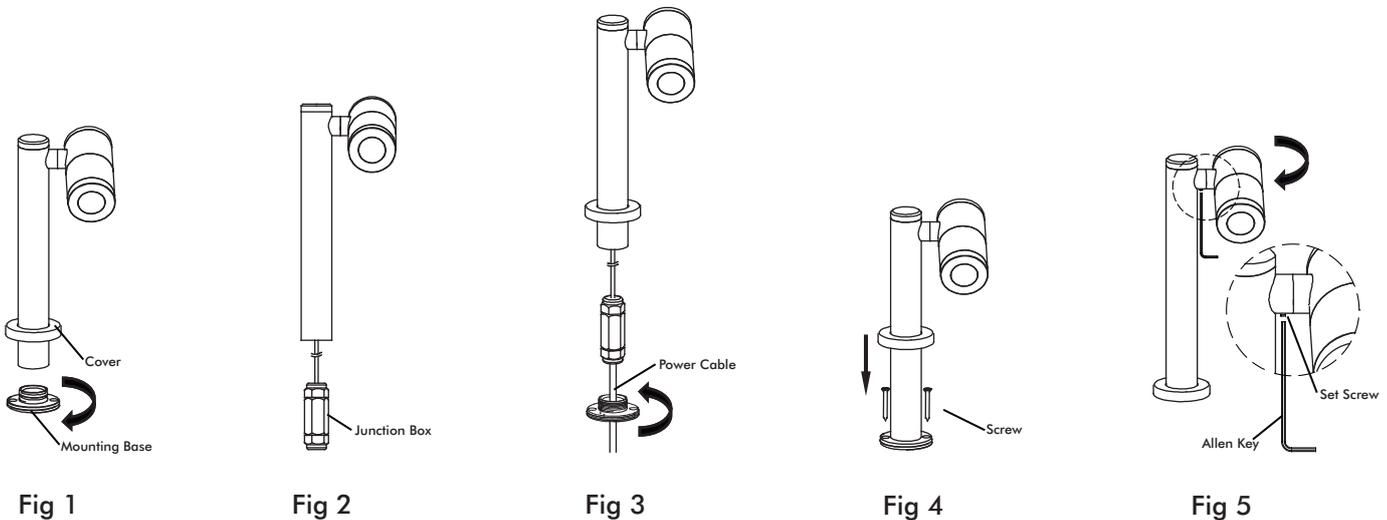

PLEASE READ THESE INSTRUCTIONS CAREFULLY BEFORE INSTALLATION

Item: CW-PAL0502 / CW-PAL0902

Spec: Aluminium 5W / 9W LED PATH LIGHT, IP65, 12VAC/DC

Note: 1. A 12V transformer or constant voltage driver is required (not included).

2. Fixtures must be connected in parallel.
3. Input wattage must be 50% higher than the rated LED wattage to insure LED start-up.
4. The built-in junction box is suitable for power cable with diameter of 5~10mm.
5. Always switch off the power before installation.

1. Unscrew the cover and mounting base. (See Fig 1)
2. Shake out the junction box that is inserted into the fixture tube. (See Fig 2)
3. Connect the power cable to junction box.
4. Switch on the power, check and make sure the light fixture is on.
5. Screw the mounting base back into the rod. (See Fig 3)
6. Fix the mounting base with two screws, then screw the cover onto the mounting base. (See Fig 4)
Notice the spot direction before fitting the mounting base.
7. Adjust the angle of head as needed, and tighten the set screw with Allen Key. (See Fig 5)

Note: loosen the set screw with Allen Key before adjusting the angle of head again, or the light fixture may be damaged.

CAUTION:

ALL THE INSTALLATION MUST BE COMPLETED BY A QUALIFIED ELECTRICIAN!
